ABOUT ME

Computer Science student at Malla Reddy Engineering College specializing in Artificial Intelligence and Machine Learning (CSE-AIML). Strong in problem-solving with a growing interest in data-driven technologies and programming. Passionate about applying AI concepts to real-world challenges and continuously improving technical skills.

EDUCATION

B.Tech in [AI & ML] - [Malla Reddy Engineering College], CGPA: 6.8, Graduation: 2027
Intermediate (12th) - [Narayana Junior College], 76.7%, 2023
CBSE (10th) - [Oak Valley International School], 77.8%, 2021

TECHNICAL SKILLS

- **Language**: Python, C
 - **Web Technologies**: HTML, CSS
 - **AI/ML**: Machine Learning, Scikit-learn, Pandas, NumPy
 - **Tools**: Git, GitHub, VS Code, Jupyter Notebook
 - **Databases**: Data Warehouse
 - **Cloud**: Microsoft Azure
-

Certifications

- Tata Group Data Analytics Job Simulation on Forage
 - Microsoft Certified: Azure AI Fundamentals
 - Cisco Networking Academy Python Essentials 1
 - IBM SkillsBuild Web Development Fundamentals
 - Google Generative AI Studio – Introduction
-

PROJECTS

CURRENCY EXCHANGE RATE PREDICTION SYSTEM

Developed a machine learning-based currency exchange rate prediction system using Python, Flask, and Scikit-learn, implementing models such as Random Forest and Gradient Boosting. Performed feature engineering with lag variables and rolling statistics, built REST APIs for predictions and model comparison, and evaluated performance using MAE, RMSE, and R^2 metrics.

RESUME ANALYZER

Developed an AI-powered resume analyzer using Python, Flask, and transformer-based NLP models (RoBERTa) to evaluate resumes against job descriptions. Implemented semantic embeddings and cosine similarity for match scoring, along with resume parsing for PDF, DOCX, and TXT formats and keyword extraction to identify matched and missing skills.
